

I am finding it slightly hard to find ample time to write this letter as today is the 30th. Don't worry about all the mud and water on the pages as for the past few days it has been raining quite heavily from about 4:30 until six then steady rain until late at night.

Its great when you do a pit duty. In the pit itself there is about a foot of water and mud all around. Quite a nice way to spend two hours in the middle of the night.

Also if you are lucky, your bunker doesn't leak. I've have been lucky so far.

I have had trouble with ants nesting, but being brave I get my little can of spray out and bingo, you have never seen so many ants kicking and dancing so gracefully in all your life. ~~and~~ cruel but fair. its my hole.

We are supposed to be leaving here on the sixth of June. I hope so anyway. I have got a lot of living left to do.

I had better finish up now. By the time you get this I will have been here five months. Time is still going fairly quickly. Do keep well. sent a photo of David. Lots of love Ken
Max & Patti have done it eh!
